tytocare[™]

Fulfilling the Promise of Telehealth

TytoCare is connecting patients and clinicians like never before

Can clinicians reliably diagnosis an ear infection, sore throat, or upper respiratory infection when their patients are miles away?

Now they can with TytoCare, a complete telehealth solution that enables a comprehensive telehealth visit with a physical exam, anytime and anywhere.

TytoVisit™

A complete telehealth platform

TytoVisit delivers the most comprehensive telehealth visit and physical exam available. Our HIPAA-compliant cloud platform lets clinicians conduct live video remote examinations, review and share exam data, and schedule telehealth visits. All Tyto products use the TytoVisit platform which includes:

- The TytoApp™ that enables a “live telehealth exam” or “exam and forward” for later review
- Open APIs for integration with EHR systems, existing telehealth platforms and 3rd party tools (BP, SpO2, scales)
- Patient scheduling, questionnaires, e-prescriptions and analytics

TytoHome™

A check-up without the check-in

TytoHome lets patients perform a comprehensive exam at home and share results with a remote physician for a quick, convenient diagnosis. Proprietary guidance technology ensures patients can easily capture accurate exam results so they can be confident that the remote diagnosis is the right diagnosis. Includes:

- The TytoHome device and attachments for examining the ears, throat, lungs, heart, skin, and capturing heart rate and temperature
- TytoApp for live video telehealth exams or “exam and forward”
- Travel case and rechargeable battery

Heart Exam

Enables clinicians to hear and capture heart sounds

Skin Exam

High resolution digital images of rashes, eczema, and other skin lesions inform dermatology diagnoses

Heart Rate

Digitally records heart rate

Throat Exam

Tongue depressor attachment makes it easy to capture clear images of the tonsils to help clinicians diagnose infections

Lung Exam

Enables clinicians to hear and diagnose whether it's a cold, asthma, bronchitis or something more serious

Temperature

Get an accurate temperature read with our no-touch infrared basal thermometer

Ear Exam

High resolution images of the canal and tympanic membrane enable clinicians to diagnose ear infections

Abdominal Exam

Captures stomach and bowel sounds to help diagnose gastrointestinal issues

TytoPro™

Expand your reach beyond the clinic

Designed for professional-to-professional use, TytoPro lets clinicians extend the reach of their specialists to home care, schools, and urgent care clinics. With TytoPro, clinicians can conduct a remote exam to obtain a second opinion or specialist consult. Includes:

- The TytoPro device with robust hardware to withstand the rigors of every day office use
- A high resolution digital camera, thermometer, otoscope, stethoscope (with volume, bell and diaphragm filters), and ear buds
- The TytoApp with professional workflow

TytoClinic™

A complete, portable telehealth clinic

TytoClinic turns any remote point-of-care location, such as employer work sites, retail clinics, schools or nursing facilities, into a comprehensive yet affordable telehealth clinic. Patients, caregivers, and healthcare providers can easily connect with a clinician or specialist for a remote examination and diagnosis, second opinion, or specialist consult. Includes:

- The TytoPro kit and exams
- Pulse oximeter and blood pressure cuff, and ability to add additional vitals
- Preloaded iPad®, stand and headphones

TytoClinic is also available in a travel version for those who require a portable, lightweight solution.
