Important information: Graphics & System Memory: 64-bit operating system is required to support 4GB or more of system memory. Significant system memory may be used to support graphics, depending on system memory size and other factors. Hard Drives (GB and TB): GB means 1 billion bytes and TB means 1 trillion bytes; actual capacity varies with preloaded material and operating environment and will be less. Watt Hour (WHr): Watt Hour is not an indication of battery life. Battery Life: Based on testing using the Mobile Mark 2014 battery life benchmark test. For more information about this benchmark test, visit www.bapco.com. Test results should be used only to compare one product with another and are not a guarantee you will experience the same battery life. Battery life may be significantly less than the test results and varies depending on your product's configuration, software, usage, operating conditions, power management settings and other factors. Maximum battery life will decrease with time and use. Weights vary depending on configuration and manufacturing variability. *Subject to T&Cs.
